

elka dent

elkadent AKTIV 3

THE PROBLEM:

Cavities, tartar and gum disease are among the most common lifestyle diseases, and they can have a significant impact on your well-being.

THE CAUSE:

The move away from food that requires more chewing toward fast food and ready-made meals that are high in sugar causes plaque to collect on and between the teeth. Bacteria feed on these food scraps and produce tooth-damaging acids that can attack the teeth and irritate the gums.

THE SOLUTION:

When used regularly, **elkadent AKTIV 3** toothpaste provides comprehensive protection and long-term care for your teeth and gums. The active ingredient carbamide neutralizes dangerous acids, thus effectively supporting the natural blocking system of the saliva. The combination of allantoin and Vitamin E strengthens the gums, and an optimal dose of sodium fluoride (1450 ppm of fluoride) guarantees especially effective cavity protection.

With its special flavor profile featuring lavender, cloves, anise and the same active freshness formula that we use in our concentrated mouthwash, **“elkadent FRESH”, elkadent AKTIV 3** toothpaste gives you especially long-lasting fresh breath and a pleasantly clean-feeling mouth.

INGREDIENTS:

Aqua, Hydrated Silica, Sorbitol, Propylene Glycol, Urea, Tetrapotassium Pyrophosphate, Sodium C14-16 Olefin Sulfonate, Xanthan Gum, Aroma, Sodium Fluoride, Sodium Saccharin, Allantoin, Alumina, Tocopheryl Nicotinate, Illicium Verum Fruit/Seed Oil, Limonene, Lavandula Angustifolia Oil, Eugenia Caryophyllus Leaf Oil, Sodium Methylparaben, CI 42090

Contains sodium fluoride (1450 ppm F)

WARNING:

For adults only. Not suitable for children under the age of 6!
