BRILLANT WEISS 3D

THE PROBLEM:

Aside from the most frequently diagnosed dental diseases like tooth decay, periodontitis and tartar, in the field of dental and oral hygiene, unattractive staining of the teeth is becoming an increasingly common problem brought to the dentists.

THE CAUSE:

The natural ageing of the teeth, the indulgence of coffee, tea or red wine and regular smoking can lead to the unaesthetic discolouration of the tooth surface and in particular, the interdental spaces. The original natural white loses its pleasing, attractive charisma, which can lead to an unattractive appearance.

THE SOLUTION:

el-ce med BRILLANT WEISS 3D combines a fully tried and tested dental prophylaxis with the so-called **BRILLANT WEISS 3D** effect- to keep teeth and gums healthy for as long as possible. At the same time, natural teeth whitening is revitalized to achieve an attractive, charismatic smile.

- works in three dimensions
- naturally white teeth (The result depends on the original colour of the teeth)
- activates the gums and neutralizes plaque acids
- long lasting breath freshness

Particularly important: no aggressive abrasives that attack the enamel or the tooth neck (dentine) and can thus damage healthy teeth are employed. **el-ce med BRILLANT WEISS 3D** features a medium abrasion and thereby allows for the gentle, yet effective removal of unattractive dental plaque. What's more, **el-ce med BRILLANT WEISS 3D** contains no chemical bleaching agent.

INGREDIENTS:

Aqua, Sorbitol, Hydrated Silica, Pentasodium Triphosphate, Propylene Glycol, Urea, Xanthan Gum, Sodium C14-16 Olefin Sulfonate, Aroma, Sodium Fluoride, Zinc Chloride, Allantoin, Alumina, Sodium Saccharin, Mentha Arvensis Leaf Oil
