## PRODUCT INFORMATION

## elkadent Cool Mint – Invigorating Fresh Breath

### **THE PROBLEM:**

In addition to bad breath and an unpleasant feeling in their mouths, many people also suffer from infected or irritated gums. Instead of traditional mouthwash concentrates that need to be diluted before use, try a ready-to-use mouthwash for optimal dental and oral hygiene.

### **THE CAUSE:**

After you enjoy foods or beverages, dangerous plaque bacteria develop right in the places between your teeth that are hard or impossible for your toothbrush to reach. They can attack your teeth and irritate your gums.

### **THE SOLUTION:**

Our **elkadent Cool Mint – Invigorating Fresh Breath** mouthwash is a logical and necessary addition to your daily dental and oral hygiene, because it also works in the places between your teeth that are hard or impossible for your toothbrush to reach.

When used regularly after every brushing, **elkadent Cool Mint – Invigorating Fresh Breath** mouthwash comprehensively and effectively prevents cavities and new deposits on your teeth. In addition, the mild combination of ingredients maintains the balance of natural flora in your mouth.

Its extra fresh flavor, made from rich mint oils, feels cooling and revitalizing. It provides your breath with long-lasting freshness and gives your mouth a clean, pleasant feeling all day long.

### **INGREDIENTS:**

Aqua, Alcohol, Sodium C14-17 Alkyl Sec Sulfonate, Aroma, Allantoin, Sodium Fluoride, Sodium Saccharin, CI 42090

\*With the clinically tested ingredient sodium fluoride (500 ppm F<sup>-</sup>).

### **WARNING:**

Please do not swallow! Not suitable for children under the age of 6. Contains alcohol (11.0% Vol).
