## PUTZI CHILDREN TOOTH GEL

fluoride-free  
without artificial colorants  
without artificial preservatives  
without artificial sweeteners  
contains Xylitol, Calcium and Vitamin E

Children should be introduced to continuous teeth brushing habits as early as possible. Since healthy primary dentition is an important prerequisite for healthy permanent teeth. However, especially young children are not able to rinse their mouth properly, which results in various amounts of toothpaste being swallowed.

The fluoride-free **Putzi Children Tooth Gel** was developed especially for children aged 0 to 3 years to encourage brushing from the very first tooth.

Harmful plaque, the main cause for tooth decay, is removed gently but efficiently by low abrasive silica. The active ingredient **Xylitol** inhibits bacterial growth and supports caries prophylaxis. **Calcium** and **Vitamin E** support remineralisation and take care of the infantile mucous membranes.

The fluoride-free **Putzi Children Tooth Gel** is free from artificial colorants, sweeteners and preservatives. So the product is completely safe, if some is swallowed.

Additionally, mild mint flavour and an amazing glitter effect will make tooth brushing fun.

cruelty free  
and vegan

### PUTZI CHILDREN TOOTH GEL

#### INGREDIENTS:

Sorbitol, Aqua, Hydrated Silica, Xylitol, Tetrapotassium Pyrophosphate, Xanthan Gum, Aroma, Sodium C14-16 Olefin Sulfonate, Calcium Glycerophosphate, Tocopheryl Acetate, Mica, CI 77891

#### DIRECTIONS:

For children under the age of 2: With the eruption of the first tooth use a smear of toothpaste once daily.

Children aged two or older: Use a pea sized amount twice daily for supervised brushing to minimize swallowing.
