

### Mouthwash

## elkadent Fresh

- DERMATOLOGICAL TESTET (TEST RESULT: VERY GOOD),
- WITH ESSENTIAL OILS FROM LAVENDER, CLOVE AND ANISE

### THE PROBLEM:

A widespread problem amongst the population is bad breath. Many people therefore complement daily brushing with mouthwash.

### THE CAUSE:

Microorganisms are often present in the small spaces between teeth which are hard to access with a toothbrush. There, they break down food remnants into dangerous plaque acids which can attack teeth and irritate gums.

### THE SOLUTION:

Daily tooth brushing for the manual removal of plaque is greatly optimised with **elkadent FRESH** concentrated mouthwash, which contains zinc chloride, an antibacterial agent. After brushing, the antibacterial mouthwash penetrates the spaces between teeth and thus fights the causes of bad breath.

The use of **elkadent FRESH** concentrated mouthwash ensures a long lasting improved breath and active freshness in the throat and mouth area.

### INGREDIENTS:

Alcohol, Aqua, Aroma, Sodium C14-17 Alkyl Sec Sulfonate, Zinc Chloride, Illicium Verum Oil, Sodium Saccharin, Lavandula Angustifolia Oil, Eugenia Caryophyllus Leaf Oil, Eugenol, Limonene, Linalool, Ascorbic Acid

### WARNING:
